

Useful websites

<http://www.hantswizkid.net/> Wizkid always has at least one maths website linked to class activities.

<http://www.bbc.co.uk/bitesize/ks1/maths/>

<http://www.ictgames.com> select 123 Numeracy

<http://www.iboard.co.uk/activities/subject/maths> (although some are designed for the Interactive whiteboard)

It is always good to work with your child to share their learning, some activities are good to practise skills but may not offer opportunities to 'use and apply' their knowledge.

<http://nrich.maths.org/thismonth/1and2> offer more 'problem solving' open ended maths problems which you and your child can solve together. The discussion of how and why we need to do that is extremely valuable.
